

Self-Propelled Modular Trailer

▼ Shown: **SPMT600**

- Multiple configurations possible
- Minimized height and slim design
- Intellidrive wireless control system
- One power pack per 3 trailers maximum

SPMT Series

Capacity:

67 tons

Transport Speed:

2 mph (unloaded)

The Enerpac Self Propelled Modular Trailer features a minimized height and slim design, which make it very easy to operate in confined spaces. Each trailer has 3 axles. Each wheel unit has a steering as well as a lifting cylinder at its disposal. Wheel propulsion is accomplished by hydraulic propulsion. The power pack has a 55 hp tier 4 driven engine.

The SPMT is controlled by Intelli-drive, a wireless control system that allows the entire system to be operated by one person.

One of the unique features of the system is that it is able to be containerized. Two trailers and a power pack can be shipped inside a 20 ft. container.
